

Group Assessment Contribution Form

Course: COS30049 - Computing Technology Innovation Project

Project/Assignment Title: Spam Detection

Group Number: 2 - TechNova

1. Group Members:

No	Name	Role	Student ID
1	Nguyen Thank Kien	Leader	105507742
2	Bui Tien Hung	Member	105555411
3	Truong Nam Hung	Member	105556375
4	Nguyen Huu Hieu	Member	104988566

2.Team Task & Contribution Log

To be completed and signed by all group members. This section documents the specific tasks each member was responsible for and provides evidence of their work. All members must reach a consensus on the described contributions

- Example: " Design: The user login and registration pages using Figma."
- Example: " Documentation: The API endpoints for user authentication."
- Example: " Set up the project repository on GitHub. "

Group Member	Tasks
Thanh Kien	Set up project repository and GitHub branch structure Built and maintained the full ML training pipeline (data_preprocessing.py, model_training.py, export_training_data.py) Trained and saved all four classification models Identified and reported bugs throughout development Contributed to report writing: Technical Implementation and Implementation Evaluation sections Performed final review and quality check on code and report before submission Coordinated task assignment and tracked project progress across all weeks
Tien Hung	Resolved bugs identified during development and testing phases Led report writing: Data Collection, Data Processing, and Data Analysis sections Implemented and maintained modular code structure across src/ and viz/ directories Developed hyperparameter_tuning.py and metadata_pipeline.py modules Reviewed and revised the report for accuracy and completeness
Nam Hung	Performed bug testing and documented issues across all modules Authored all meeting minutes for Weeks 5 through 8 Conducted code review and evaluation across all .py modules Contributed ideas for K-Means clustering strategy and augmentation approach Wrote the Machine Learning Model Selection and Model Comparison sections of the report

Huu Hieu	Assisted with coding support across clustering_augmentation.py and viz modules Conducted functional testing on trained models and prediction pipeline Wrote the Introduction, Problem Framing, and Conclusion sections of the report Contributed ideas for metadata feature engineering and robustness testing strategy Supported README documentation and final submission preparation
----------	---

3. Team Member Contributions:

As a group, discuss and evaluate the contributions of each team member in the table below. The final evaluations **must represent a consensus** agreed upon by the entire team.

Group Member	Contribution (100% in total)	Quality of Work (1-5)	Timeliness (1-5)	Collaboration (1-5)
Thanh Kien	25%	4	4	4
Tien Hung	25%	4	4	4
Nam Hung	25%	4	4	3
Huu Hieu	25%	4	3	4

Contribution and Grading Policy:

- 1. Normal Grade:** Members contributing 33% or more will receive the full project mark.
- 2. Penalty:** Members contributing less than 33% will incur a penalty. Their grade will be calculated as follows:
 - $(\text{Contribution Percentage} / 33) \times \text{Group Mark}$

Example: If the total group mark is 15, and a member contributes 20%, their grade will be $(20 / 33) \times 15 = 9$

Name	Signature
Thank Kien	<i>Thank Kien</i>
Tien Hung	<i>Tien Hung</i>
Nam Hung	<i>Nam Hung</i>
Huu Hieu	<i>Huu Hieu</i>
